

FEED4PROFIT

The bigger picture – going beyond feed formulation to maximize profit/pig.

Smarter Feeding. Stronger Profits.

Data-driven decisions for today's swine producers.

Library A (Energy)		Library B (Energy)	
Phase 1	Phase 2	Phase 1	Phase 2
Diet Cost: 232.41	ME (kcal/kg): 3444.1498	Diet Cost: 216.44	ME (kcal/kg): 3279.8062

WHAT IS FEED4PROFIT?

Feed4Profit is an integrated economic and nutrition modeling tool that helps you compare feeding programs and identify the most profitable strategy.

WHAT CAN FEED4PROFIT DO?

FORMULATE WITH CONFIDENCE

Build and compare diets with real ingredient prices, nutrient constraints, and inclusion limits.

PREDICT PERFORMANCE

Model how your diets impact growth, feed intake, and feed efficiency.

DRIVE PROFITABILITY

Evaluate income, feed cost, and income over feed cost to find the most profitable program.

MANAGE RISK WITH INSIGHT

Use sensitivity analysis to see how changes in ingredient and market prices affect your bottom line.

POWERFUL INSIGHTS. REAL IMPACT.

IMPROVE MARGINS

Identify feeding strategies that maximize profit.

IMPROVE ACCURACY

Base decisions on science, economics, and real-world prices.

SAVE TIME

Compare different scenarios in minutes, not hours.

STAY AHEAD

Adapt quickly to market changes and reduce risk.

Better decisions.
Better returns.

FEED IS ~70%
OF TOTAL PRODUCTION COST

Small improvements in nutrition can lead to big improvements in profit.

Brought to you by U.S. Soy.
Fully funded by the Soy Checkoff.
