

START
HERE

1

SET PREFERENCES

- Select the wanted scenario
- Scenario selection auto-loads Libraries A & B
- Select a target month/year (This will control the baseline commodity prices used in the session)

2

BUILD YOUR DIETS

- Explore Diet Libraries (A vs B)
- Select the phase (phase 1-4)
- Adjust: » Ingredient prices (\$/ton)
» Inclusion levels (min/max %)
» Nutrient constraints

Feed Formulation

3

PREDICT PERFORMANCE

- Select a KPI: BW, ADG, ADFI, or FCR
- Set initial and final body weight
- Add performance impacts: ingredients, nutrients, ratios
- Use this section to test how diet changes affect growth and efficiency

Performance Modeling

4

EVALUATE ECONOMIC IMPACT

- Select the target month and year
- Review: » Income
» Feed cost
» IoFC (Income Over Feed Cost)

Compare programs across time instantly!

Tip: IoFC is an essential outcome for decision-making.
